

Ideation Phase

Define the Problem Statements

Date	30 June 2025
Team ID	LTVIP2025TMID32230
Project Name	SmartSDLC – AI-Enhanced Software Development Lifecycle
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - <i>who are they?</i>	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - <i>what are they trying to achieve?</i>	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - <i>what bothers them most?</i>	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - <i>what needs to be solved?</i>	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - <i>how does it impact them emotionally?</i>	Describe the emotions the result from experiencing the problems or barriers

SmartSDLC

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a software developer or team lead	speed up and streamline the software development lifecycle	manual processes are time-consuming and prone to human error	I lack AI-powered tools that can automate requirement	frustrated and overworked

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
				extraction and code generation	
PS-2	an IT project manager	ensure high-quality software delivery within tight deadlines	it's difficult to manage evolving requirements and testing efforts	the traditional SDLC methods are not dynamic or AI-assisted	anxious about delays and client dissatisfaction
PS-3	a student or novice developer	learn and build software efficiently using AI support	I don't have access to tools that can guide or automate SDLC steps	current tools are complex, isolated, and not integrated with modern AI	confused and demotivated

need more efficient development processes

Insight

Existing manual development practices are time-consuming and error-prone

How might we streamline software development processes by leveraging AI technologies?
