

A Sprint fixed period or duration in which a team works to complete a set of tasks

An **Epic** is a **big task or project** that is too large to complete in one sprint. It is broken down into **smaller tasks (stories)** that can be completed over multiple sprints.

A **Story** is a small task . It is part of an **Epic**.

A **Story Point** is a number that represents how much effort a story takes to complete.
(usually in form of Fibonacci series)

- 1- Very Easy task
- 2- Easy task
- 3- Moderate task
- 5- Difficult task

Sprint 1: (5 Days)

Data Collection

Collection of Data **2**

Loading Data **1**

Data Preprocessing

Handling Missing Values **3**

Handling Categorical values **2**

Sprint 2 (5 Days)

Model Building

Model Building **5**

Testing Model **3**

Deployment

Working HTML Pages **3**

Flask deployment **5**

Total Story Points

Sprint 1 = 8

Sprint 2 = 16

Velocity= Total Story Points Completed/ Number of Sprints

Total story Points= 16+8 =24

No of Sprints= 2

Velocity = (16+8)/2= 24/2

12 (Story Points per Sprint)

Your team's velocity is 12 Story Points per Sprint.

SmartSDLC – AI-Enhanced Software Development Lifecycle

◆ Agile Breakdown for SmartSDLC – AI-Enhanced Software Development Lifecycle

◆ Key Concepts

Sprint: A 5-day period where tasks are completed.

Epic: A large module like Data Collection, Model Building, or Deployment.

Story: A smaller, actionable task under each Epic.

Story Point: Estimated effort using the Fibonacci scale (1, 2, 3, 5...).

Velocity: Average number of story points completed per sprint.

🧩 Sprint 1 (5 Days)

Epic: Data Collection

Story 1: Collection of Data → ● 2 SP

Story 2: Loading Data → ● 1 SP

Epic: Data Preprocessing

Story 3: Handling Missing Values → ● 3 SP

Story 4: Handling Categorical Values → ● 2 SP

✅ Total Story Points – Sprint 1: 8 SP

🧩 Sprint 2 (5 Days)

Epic: Model Building

Story 5: Model Building → ● 5 SP

Story 6: Testing Model → ● 3 SP

Epic: Deployment

Story 7: Working HTML Pages → ● 3 SP

Story 8: Flask Deployment → ● 5 SP

✅ Total Story Points – Sprint 2: 16 SP

📊 Sprint Summary

Sprint Story Points

Sprint 1 8

Sprint 2 16

🧮 Total Story Points = 8 + 16 = 24

🕒 Total Sprints = 2

⚡ Velocity = Total Story Points / No. of Sprints = 24 / 2 = 12 SP/Sprint

Conclusion

Your team's velocity is 12 story points per sprint, which is a solid metric for planning future iterations of your SmartSDLC project. This helps estimate how many sprints you'll need to complete future Epics as the project scales.
